
**LEHR ACQUIRES PROPANE FUEL SYSTEM TECHNOLOGY COMPANY,
ENVIROGARD**

Expanding its offering of clean burning, alternative fueled engine products.

FEBRUARY 23, 2015 --- Clean-Power Innovator LEHR, LLC. today announced the recent acquisition of EnviroGard, a propane fuel system technology company. EnviroGard was a division of Onyx Environmental Solutions primarily focused on propane engines and conversion kits for gasoline engines. The acquisition will accelerate LEHR's strategy, which is focused on market expansion, environmentally friendly technologies for larger engines in the high-growth outdoor power equipment, and construction industry markets.

"Here at LEHR, propane technology is a key driver in our business strategy, and EnviroGard is a terrific, strategic, and financially compelling fit for our business," said Bernardo Herzer, LEHR CEO and Founder. "This acquisition will help expand our footprint into the outdoor power equipment markets, accelerating growth and building positive momentum for LEHR's business in 2015 and beyond."

With awards and accolades from the U.S. Environmental Protection Agency, Popular Science and Popular Mechanics magazines, and the National Marine Manufacturers Association, LEHR is a leading force in the marine propane-powered outboard market. Combining LEHR's patented technologies and EnviroGard's comprehensive product portfolio and longstanding OEM relationships will strengthen LEHR's reach into vertical markets including outdoor power equipment and construction equipment industries.

"LEHR's advanced fuel system technology and global manufacturing and distribution capabilities add tremendous value for all EnviroGard stakeholders." said Jeremy Hahne, now VP Business Development at LEHR. "We are extremely pleased to have partnered with Captain Bernardo Herzer and the rest of the LEHR team to rapidly expand our alternative fueled engine technology, while helping to create a healthier and more sustainable planet," continued Hahne.

EnviroGard has become a new division of LEHR, LLC. and will continue to offer its current products and conversion kits to both original equipment manufacturers and their dealers while expanding the combined technologies into new product markets.

###

About EnviroGard

EnviroGard is a leader in propane fuel system technology for small engines. Headquartered in Charlotte, NC, EnviroGard develops and certifies propane fuel systems to achieve the highest possible performance while dramatically reducing harmful emissions when compared to conventional gasoline engines.
